PRATHMESH KUNTURWAR

AI Engineer • LLM Systems • Workflow Automation

Chhatrapati Sambhajinagar, India • +91 82639 23623 • kunturwarprathmesh@gmail.com • LinkedIn • github.com/Prathmeshkunturwar

SUMMARY

AI Engineer with 1+ year of experience delivering production LLM systems, intelligent agents, and end-to-end workflow automation that saved 2,500+ manual hours annually. Proficient in Python, LangChain, n8n, and AWS. Adept at collaborating cross-functionally with product and operations stakeholders to translate complex business problems into scalable, automated solutions.

WORK EXPERIENCE

AI Developer | Call Center Doctors *March 2025 – Present*

- Engineered end-to-end workflow automation (LangChain + Python + n8n) eliminating repetitive data entry and call categorization, reducing team manual effort by 35% — from ~40 hrs/week to ~26 hrs/week.
- Developed LLM-based call summarization pipeline generating structured JSON (speaker, sentiment, emotion, transcript), enabling downstream analytics and QA teams to process 3x more calls per shift.
- Architected vector search and RAG retrieval pipelines for knowledge-augmented agent responses; deployed and maintained services on AWS EC2/S3 with Docker-based model orchestration.
- Collaborated with cross-functional product and operations stakeholders to scope and prioritize automation PoCs; iterated agent workflows and reduced classification error rate through targeted data labeling.
- Monitored production model performance metrics and data quality dashboards; implemented scheduled retraining pipelines to maintain accuracy and throughput SLAs.

Web Development Intern | Swagitup *Sep 2024 – Febr 2025*

- Delivered front-end and back-end features in an agile team using JavaScript and Firebase; wrote unit and integration tests and supported CI/CD deployment pipelines, contributing to on-time product releases.

PROJECTS

Payroll Automation System — *Full-Stack Web App · Call Center Doctors*

- Designed and built a payroll automation platform (Python Flask + React.js + MySQL) integrating BambooHR, WebWork, ViciDial, and Google Sheets APIs for 100+ employees across 15+ campaigns.
- Reduced payroll cycle time from 2–3 days to under 1 hour, saving ~871 hours annually and eliminating manual reconciliation errors across all campaigns.

QC Automation Bot — *AI-Powered Call Quality Control · Call Center Doctors*

- Built an automated QC pipeline processing thousands of sales recordings daily via a multi-model consensus system (Google Gemini + GPT-4 + DeepSeek) with OpenAI Whisper transcription.
- Automated appointment routing to GoHighLevel CRM with Slack notifications and Google Sheets reporting, cutting per-appointment processing time from ~30 minutes to 3–4 minutes.

Data Dashboard — *Lead Management & Dialer Platform · Call Center Doctors*

- Architected a FastAPI + React/TypeScript dashboard managing 16.9M+ lead records across 15+ campaigns, integrating PostgreSQL, ViciDial APIs, Google Sheets, and Slack.
- Optimised ViciDial upload workflows from 2–4 hours to 10 minutes and reduced dashboard load time from 60s to 11s — collectively saving ~1,716 hours annually.

At-Risk Client Dossier — *Automated Client Health Monitoring · Call Center Doctors*

- Developed AI-powered client risk platform combining Whisper, GPT-4, and RoBERTa sentiment analysis to auto-generate PDF/HTML dossiers covering call quality, lead trends, and scheduling signals.
- Reduced manual client health review time from several hours to under 5 minutes per client, enabling proactive retention interventions.

TECHNICAL SKILLS

AI & LLM: LangChain · LangGraph · OpenAI APIs · Google Gemini · DeepSeek · Whisper · RAG · Vector Search · Prompt Engineering

ML Frameworks: PyTorch · TensorFlow · Scikit-learn · RoBERTa · OpenCV · MediaPipe

Programming: Python · JavaScript · TypeScript

Infrastructure: AWS (EC2, S3) · Docker · n8n · FastAPI · Flask · React.js · PostgreSQL · MySQL · SQLite · Vector DBs

Integrations: BambooHR · ViciDial · GoHighLevel CRM · Google Sheets API · Slack API · Firebase · GoHighLevel

EDUCATION

B.Tech in Computer Science Engineering *Jun 2025*

MGM JNEC (Jawaharlal Nehru Engineering College), Sambhajinagar

Relevant Coursework: Machine Learning, Data Structures & Algorithms, Database Management Systems, Computer Networks, Natural Language Processing

CERTIFICATIONS

AWS Certified Cloud Practitioner *In Progress*

Amazon Web Services

ADDITIONAL

Languages: English (Fluent) · Hindi (Fluent) · Marathi (Fluent)

Leadership: TEDx MGMU — Logistics Head: Coordinated cross-functional teams for event planning, scheduling, and guest management for 500+ attendees.
